Strategy to Maximize Google Reviews for Quality Sweets NJ

Objective: build a simple, repeatable system that helps Quality Sweets earn more recent Google reviews from in-store and catering customers.

Illustrative examples: a review stand placed near the checkout counter and a review card included inside takeout bags.

1) Review Stand + Review Card

Place a small Google review stand with NFC/QR near the register, and include a review card inside each takeout bag. This gives customers two simple opportunities to leave a review.

2) Staff Ask

To maximize the chances of getting reviews, the staff should politely ask **every in-store customer** to leave a review when it feels natural at checkout.

Suggested staff message:

> *"If you have a minute, we'd love for you to share your experience on Google and mention the dish or sweet you enjoyed today."*

This keeps the request friendly while encouraging customers to mention the specific sweet or dish they purchased.

3) Catering Follow-Up

For catering and larger orders, send one follow-up WhatsApp or text message 24–48 hours after the event thanking the customer and sharing the Google review link.

Recommended message: "Thank you for choosing Quality Sweets for your event. If you have a minute, we'd really appreciate a Google review and any mention of the sweets or dishes you ordered."

How iSearch Digital Can Help

- Create the Google review link / QR code
- Design the review stand and bag card
- Provide staff messaging guidance
- Track review growth month to month

Success Metric

Measure the number of new Google reviews each month and compare the results against store traffic and catering activity.
